REAL ESTATE EXECUTIVE ASSISTANT

Build steps

STEP 1

Load the demo data

Set up project, property, customer and opportunity tables in Dataverse with demo records.

STEP 2

Create the agent

Build it in Copilot Studio and describe the executive audience and the decisions it supports.

STEP 3

Add the Dataverse tool

Connect the Dataverse MCP Server tool so the agent can read the tables and update records.

STEP 4

Add the Outlook connector

Connect Office 365 Outlook so the agent can send leadership briefings by email.

STEP 5

Write the instructions

Define the snapshot, risk radar and deal matching, and require confirmation before any update.

STEP 6

Test and publish

Run the demo prompts against the demo data, then publish to Microsoft 365 Copilot.
